## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to a system, classified in class 239, subclass 450.
  - II. Claims 13-15, drawn to an audible signal means, classified in class 239, subclass 72.
  - III. Claim 16, drawn to a method, classified in class 239, subclass 1.
  - IV. Claims 17-19, drawn to a system, classified in class 239, subclass 74.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, IV and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Inventions I and IV do not require the audible signal means of Invention II. The subcombination has separate utility such as fire alarm.

3. Inventions IV and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

Art Unit: 3752

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention IV does not require the distribution manifold of Invention I. The subcombination has separate utility such as a fire extinguishing system.

4. Inventions III and I, II, IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practice by another materially different apparatus which does not require: the manifold of invention I; the audible signal means of Invention II; and the flow measuring means of Invention IV.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
